SUMMARY

Software Engineer with experience building backend services and REST APIs using **Java, Spring Boot, Python, and FastAPI**. Experienced in microservices, cloud-based data integration, and AI-powered document processing across **Azure and AWS**. Strong focus on backend development, API integration, and improving processing efficiency through practical engineering solutions.

EXPERIENCE

Publicis Sapient Nov 2023 – Present
Associate Software Development Engineer 2 (ASDE-2) Bengaluru, India

- **Capital Group (May 2026 – Present)**
  - Developed backend APIs using **Python and FastAPI**, alongside a **Java-based microservice** for backend processing.
  - Built frontend components using **React and Redux** for UI development and state management.
- **Learning Response (Dec 2025 – May 2026)**
  - Developed backend APIs and microservices using **Java and Spring Boot** to support application workflows.
  - Implemented serverless processing and cloud storage workflows using **AWS Lambda and Amazon S3**.
- **UPS Alchemy (Jan 2025 – Dec 2025)**
  - Developed intelligent document processing backend services using **Java, Spring Boot, Python, Azure AI**, and **Azure OpenAI (LLMs)** to process and interpret logistics shipment documents.
  - Built REST APIs for document classification and extraction using **Azure Document Intelligence** and **Azure Content Understanding**.
  - Explored and implemented **Azure AI Foundry Agents** with **Python Azure Function Apps** to interact with AI models and integrate API-based workflows.
  - Containerized backend services using **Azure Container Apps** and **Azure Container Registry**; configured secure service communication using **Managed Identities**, **Azure Key Vault**, and **Azure App Configuration**.
- **Pandora A/S – Loyalty Integration Migration (Dec 2023 – Jan 2025)**
  - Optimized large-file processing by migrating the workflow from **Azure Logic Apps to Azure Data Factory**, reducing processing time from **30-45 minutes to 3-4 minutes** based on measured before-and-after results.
  - Developed **Java and Spring Boot** microservices supporting the migration of loyalty services from Brierley to Salesforce.
  - Built data integration workflows using **Azure Functions, Azure Logic Apps, and Azure Data Factory** to transfer loyalty data across systems.
  - Implemented file-processing and data-exchange workflows using **Azure Blob Storage** and FTP integrations.

Let's Grow More (LGMVIP) Oct 2022 – Dec 2022
Web Development Intern Remote

- Built UI components using **HTML, CSS, JavaScript, and Bootstrap**, integrating APIs for dynamic content handling.

PROJECTS

AI Software Engineer | *Python, FastAPI, React, Azure AI, GitHub API*

- Built an AI-powered software engineering agent using **Python, FastAPI, React, and Azure AI** to convert GitHub issues into code changes, automate testing, and create/update pull requests with validation and merge-conflict resolution.

EDUCATION

National Institute of Technology, Rourkela 2019 - 2023
B.Tech in Computer Science and Engineering CGPA: 8.16

SKILLS

Languages: Java, Python, JavaScript, C++
Tools & DevOps: Git, GitHub APIs, Docker, Maven, npm
Backend: Java, Spring Boot, Python, FastAPI, REST APIs, Microservices, Distributed Systems
Databases: PostgreSQL, SQL Server, MongoDB
Cloud & AI: AWS, AWS Lambda, Azure, Azure AI Foundry, Azure OpenAI, Doc Intelligence, Content Understanding, Functions, Logic Apps, ADF, Blob Storage, Container Apps, ACR, Key Vault, Amazon S3
