SUMMARY

Software Engineer with experience building backend applications and cloud-native services using **Java, Spring Boot, Python, and FastAPI**. Skilled in developing REST APIs, microservices, document processing workflows, and distributed applications, with experience integrating AI-powered services and deploying applications on **Azure** and **AWS**.

EXPERIENCE

Publicis Sapient

Nov 2023 – Present

Associate Software Development Engineer 2 (ASDE-2)

Bengaluru, India

• Learning Response (Apr 2026 – Oct 2026)

- * Developed backend services using **Java and Spring Boot** for building scalable APIs and microservices.
- * Worked with **AWS Lambda** and **S3** for implementing serverless processing and storage solutions.

• UPS Alchemy (Oct 2025 – Apr 2026)

- * Developed intelligent document processing backend services using **Java, Spring Boot, Python, Azure AI**, and **Azure OpenAI (LLMs)** to process and interpret logistics shipment documents.
- * Built REST APIs for document classification and extraction using **Azure Document Intelligence** and **Azure Content Understanding**.
- * Explored and implemented **Azure AI Foundry Agents** with **Python Azure Function Apps** to interact with AI models and integrate API-based workflows.
- * Containerized backend services using **Azure Container Apps** and **Azure Container Registry**; configured secure service communication using **Managed Identities**, **Azure Key Vault**, and **Azure App Configuration**.

• Pandora A/S Loyalty Integration Migration (Sept 2024 – Oct 2025)

- * Developed backend microservices using **Java and Spring Boot** to support the migration of loyalty services from Brierley to Salesforce.
- * Built integration pipelines using **Azure Logic Apps**, **Azure Functions**, and **Azure Data Factory (ADF)** for orchestrating loyalty data workflows.
- * Implemented encrypted file processing pipelines with **Azure Blob Storage** and FTP integrations for secure data exchange.

• Order Inventory Management System (Dec 2023 – Apr 2024)

- * Developed product catalog and inventory management features using **Java, Spring Boot, React, and Azure**, implementing inventory services, product category pagination, and product image upload functionality.

Let's Grow More (LGMVIP)

Oct 2022 – Dec 2022

Web Development Intern

Remote

- Worked on developing and refining responsive UI components using **HTML, CSS, JavaScript, and Bootstrap**, including API integration and dynamic content handling.

PROJECTS

CSV Validation Service | Java, Spring Boot, REST APIs

- Built a schema-driven CSV validation service with **Spring Boot** that validates large CSV uploads against dynamic schemas, supports partial-success processing, generates failed-record reports, and exposes REST APIs for schema upload, validation, and error retrieval.

EDUCATION

National Institute of Technology, Rourkela

2019 - 2023

B.Tech in Computer Science and Engineering

CGPA: 8.16

SKILLS

Languages: Java, Python, JavaScript, C++

Backend: Java, Spring Boot, Python, FastAPI, REST APIs, Microservices, Distributed Systems

Cloud & AI: AWS, AWS Lambda, Azure, Azure AI Foundry, Azure OpenAI, Doc Intelligence, Content Understanding, Functions, Logic Apps, ADF, Blob Storage, Container Apps, ACR, Key Vault, Amazon S3
